

Money Bingo

Introduction: This is a fun way to get students to learn and use financial term definitions.

Materials: Money Bingo card for each student (4 sample cards included with this activity), definitions included in the *Financial Terms Handout* (D25L1HO1) – cut up and put in a box.

Directions:

1. Every student should be given a Bingo card.
2. One person may be designated as the “caller,” who will pull the definitions randomly from the box.
3. The first student to cover five squares on a row--vertically, horizontally, diagonally--is the winner. Players should leave their cards intact until winners have been verified.

MONEY BINGO CARD #1
