# Pre-Test / Post-Test: What's the Deal?

I am sure you have seen this message on your homepage after logging in to eNDMS:

> ⚠ **As of October 20XX, no Participant Pre-tests have been entered by @firstname.lastname for Montana School** ✔ 💬
> *--shared with @MANAGER*

This is a system generated message from JAG and eNDMS. At this point, we are not requiring Montana Schools to complete and/or enter Pre-Test and Post-Test Scores. For now you may disregard this message. However, if you are already administering a Pre and Post-Test in your class, you can enter these scores using these simple steps.

1) Select your **Current Roster** from the navigation sidebar (left side of the screen)
2) Select the **Enter** link from the Toolbar (in the red banner at the top of the screen)
3) Select the **Tests** link from the drop down menu
4) Select the **Type** of pre/post-test you will be entering (Reading, Math, Language, or JAG Comp. Test)
5) Enter the **Score** for the selected test type
6) Select **Submit**

Hint: The total score scale for all tests are set at 100.0 as a default, outside of the JAG Competency Test (81.0 default). You can change this by selecting your **username** in the upper right hand corner of the screen, selecting **Preferences**, and finally entering under the **Pre/Post-Test Preferences** the scale you wish to use for each corresponding test.
